

FOR IMMEDIATE RELEASE:

3Ci Global Solutions and Capstone Fire & Safety Management Announce a Strategic Partnership to Deliver Integrated, Customized Emergency Management and Fire Safety Protection Services

San Diego, CA – August 15, 2017

San Diego based firm 3Ci Global Solutions Total Risk Management Consulting, (North America Division), and Capstone Fire & Safety Management form a strategic partnership to provide comprehensive emergency and crisis planning, risk mitigation and response services in order to enhance the safety and protection of businesses and communities world-wide.

Capstone Fire provides onsite industrial fire services, technical rescue, life safety, and compliance services at industrial project locations and fixed installations.

3Ci Global Solutions offers hands-on consulting knowledge to reduce the risks and impacts associated with all emergencies and crises by providing high value services to business entities and government agencies to ensure their clients remain fully functional no matter what adversity may strike.

Chris Dusa, Chief Strategy Officer Capstone Fire, states *"We look forward to this integrated partnership where our mutual goal is to share overhead resources where appropriate and operate under a joint model so each organization has the opportunity to deliver 100% customer satisfaction and complete liability exposure reduction"*.

Their combined products and services will be built upon a wide range of expert services and unique proprietary methodologies and 'Tool Sets' utilized at emergency incidents. These services not only protect life, but equally ensure businesses and organizations can still flourish and remain sustainable during critical incidents while safeguarding their priceless brands and reputations.

Geoff Williams, President & CEO of 3Ci Global Solutions states *"The alliance will offer a holistic approach to TOTAL emergency management providing cutting-edge approaches such as the new Ci6 EMERGENCY MANAGEMENT ENGINEERING methodologies, 3rd party software solutions providing technical advantage, business continuity and recovery solutions, expert safety consultation, analysis, cyber security and tangible field based offerings ranging from comprehensive security to on-site firefighting, rescue and safety measurements"*.

This strategic alliance is the 'blue print' for making businesses and organizations safer, more competitively sustainable and economically productive during any abnormal situation arising.
